

THE AGTECH STEM COMMUNITY CHAMPIONS PROGRAM

Empowering Local Businesses to Fuel Academic Innovation & Campus Wellness

The Vision: True community resilience is built when local commerce, cutting-edge technology, and K-12 education work in absolute alignment. The Ag-Tech Community Champions Program invites visionary businesses to step beyond the role of a traditional vendor and become an active architect of the future generation.

Why This Program Matters

Many public and independent schools across the country face immediate resource scarcity, locking them out of advanced technical infrastructure. At the same time, traditional STEM education remains tethered to passive textbook models that fail to prepare students for the modern engineering workforce.

By becoming a Community Champion, your business bridges this gap. You directly sponsor a turnkey, high-density vertical farming lab and multi-disciplinary STEM curriculum for a local school—transforming an underfunded classroom into a high-tech powerhouse that grows fresh, organic, zero-pesticide produce for the entire student body.

THE 4 WAYS TO CHAMPION A SCHOOL

Select the involvement pathway that best aligns with your business operations and philanthropic goals:

1. The Ambassador Pathway (Ignite the Spark)

You serve as the trusted bridge. By making a direct, warm introduction between our educational team and your local school board, principal, or Career & Technical Education (CTE) director, you bypass bureaucratic hurdles and accelerate deployment.

2. The Patron/Founder Pathway (Fund the Future)

Remove financial barriers for an underfunded school. Your business can fully sponsor the initial **\$140,000 infrastructure investment**, act as an anchor donor, or lead a co-branded community crowdfunding campaign to bring a state-of-the-art lab to life.

3. The Cafeteria-to-Commerce Pipeline (Feature the Harvest)

Create a proud, closed-loop economic cycle. Commit to purchasing a portion of the premium, soil-less greens and herbs engineered by the students at your adopted campus and proudly feature them on your commercial menus or retail shelves.

4. The Executive Mentorship Track (Inspire Next-Gen Talent)

Step into the classroom. Your leadership, operational, or technical teams host guest lectures, panels, or career-day seminars at the school, showing students how their classroom Python coding, systems engineering, and chemistry translate into high-wage modern careers.

WHAT YOUR BUSINESS GAINS: THE CHAMPION ADVANTAGE

Sponsoring an Ag-Tech STEM lab isn't just an act of charity, it is a powerful, highly visible business decision that yields deep community integration and unmatched brand value.

Unmatched Local PR & Brand Loyalty

Position your brand at the absolute forefront of regional innovation and student health. Sponsoring businesses receive permanent co-branded plaque placement outside the school's Ag-Tech facility, prominent features in press releases, and high-impact digital content opportunities showcasing your direct impact on children's nutrition and education.

A Story Your Customers Can Taste

If your business operates in the food, restaurant, or hospitality sector, you gain a marketing story that competitors cannot match. Feature menu items with tags like: *"Proudly featuring organic Genovese Basil grown, coded, and harvested by the students of Global Academy via our Community Champions partnership."*

Verified ESG & Sustainable Impact

For corporate clients looking to fulfill strict Environmental, Social, and Governance (ESG) mandates, this partnership delivers clear, measurable metrics. Eliminate 100% of agricultural transport emissions (Zero Food Miles), eliminate harmful synthetic pesticides, and actively lower the carbon footprint of your local community food grid.

READY TO ADOPT A SCHOOL?

Let's design your community legacy together.

Getting started is simple. Our team handles 100% of the technical manufacturing, physical installation, software calibration, and teacher training. You focus entirely on the community connection.

- **Step 1: The Consultation** – We evaluate your philanthropic goals and match you with a priority school in your geographic footprint (or integrate a school you already have in mind).
- **Step 2: The Blueprint** – We design a co-branded funding or integration model tailored to your business, whether you are acting as a solo structural patron or launching a Patron/Founder crowdfunding drive.
- **Step 3: The Ribbon-Cutting** – Celebrate with school board administrators, parents, and local media as the full-spectrum LED vertical arrays power up and the curriculum officially launches.
